

KRISHNAJITH P U

CIVIL ENGINEER [immediately Available]

+91 9746224068 erkrishnajith007@gmail.com Thrissur, Kerala

PROFESSIONAL SUMMARY

ADNOC-approved Civil Site Engineer with 3+ years of experience delivering oil & gas civil infrastructure, substations, concrete foundations, and pipeline civil works in active operating environments. Proven track record executing site supervision under strict Permit to Work (PTW) frameworks, conducting QA/QC inspections, and driving schedule integrity for major industrial projects. Expertise in managing subcontractor workflows, executing site grading/earthworks, and maintaining 100% HSE compliance. Immediately available to relocate and support large-scale EPC projects.

EDUCATION

Bachelor of Technology in Civil Engineering
APJ Abdul Kalam Technological University Kerala, India

Graduation: June 2023 | CGPA: 7.38 (First Class Degree)

PROFESSIONAL ENGINEERING EXPERIENCE

➤ **Junior Civil Engineer**

Galfar Engineering and Contracting W.L.L.(Abu Dhabi, UAE)
September 2025 – July 2026

- ADNOC Permit-to-Work Execution: Served as authorized Job Performer and Permit Holder (PTW), overseeing high-risk site safety, job safety analysis (JSA), hazard mitigation, and daily permit clearances across active operating zones.
- Industrial Infrastructure & Facilities: Supervised site execution for Remote Manifold Stations (RMS), Launcher/Receiver Stations, and pumping stations, managing foundation concreting, equipment plinths, and earthworks per IFC drawings.
- Pipeline & Trenching Operations: Led civil operations along oil and gas transmission routes, managing deep trenching, pipe-rack foundations, road crossings, and site grading.
- Quality & Technical Governance: Managed field documentation including Requests for Inspection (RFIs), Work Inspection Reports (WIRs), and daily activity registers, resolving field non-conformances with client consultants and QA/QC teams.
- Progress & Resource Optimization: Monitored daily site progress against baseline master schedules; optimized workforce, heavy machinery, and material utilization to prevent project delays.

➤ **Civil Site Engineer**

Jaanis Construction Pvt. Ltd. (Kerala, India)
November 2023 – September 2025

- Structural & Civil Site Execution: Directed daily field operations for structural concrete, excavation, reinforcement steel, shuttering, and finishing activities in strict alignment with structural IFC drawings.
- QA/QC & Technical Documentation: Generated and tracked technical records including Requests for Inspection (RFIs), Work Inspection Reports (WIRs), and Material Inspection Reports (MIRs) to uphold project quality standards.
- Cost Control & Estimation: Conducted quantity estimation, material take-offs, and Bill of Quantities (BOQ) verification to control material wastage and support project budgeting.

- Cross-Functional Coordination: Synchronized workflows between project consultants, client engineers, subcontractors, and safety teams to maintain uninterrupted project timelines.
- Compliance & Material Audits: Performed quality assurance audits and rigorous material testing to ensure all structural components complied with Indian Standards (IS codes) and government specs.

➤ **Urban Planning Engineer Trainee**

Guruvayoor Municipality (AMRUT 2.0 National Mission)

June 2023 – November 2023

- Municipal Infrastructure Monitoring: Supervised site execution of urban infrastructure projects, including municipal road works, public drainage systems, and utility networks under the AMRUT 2.0 government mission.
- Estimation & Project Documentation: Developed Detailed Project Reports (DPRs), cost estimates, and Bills of Materials (BOQs) following standard PWD/LSGD engineering specifications.
- Contractor & Work Management: Coordinated daily field activities with contractors, municipal authorities, and site engineers to drive execution quality and schedule compliance.
- Reporting & Administrative Oversight: Drafted work orders, technical evaluations, and monthly progress reports for higher government planning authorities.

ACADEMIC RESEARCH & PROJECTS

Major Capstone Project: ***Flume Study on Estimation of Manning's Roughness Coefficient for Different Bed Materials***

- Designed and engineered an experimental laboratory flume apparatus to accurately simulate steady open-channel flow patterns.
- Investigated hydraulic friction dynamics across varied natural and synthetic bed materials, evaluating precise fluid resistance indices.

Academic Seminar: ***Wicked Geotextiles in Complex Soil Stabilization***

- Conducted a comprehensive literature review on high-performance synthetic materials combining capillary action with vacuum-assisted drainage physics
- Analyzed the macro-structural performance metrics of wicked geotextiles in facilitating rapid Pore Water Pressure (PWP) dissipation.

Regional Survey Project: ***Road Network Mapping & Local Infrastructure Asset Management***

- Appointed as Group Lead for a 6-member team to survey, accurately index, and digitally draft municipal road infrastructure networks.
- Delivered comprehensive spatial data assets to the Local Self Government Department (Thrissur) for budget planning and urban development forecasting.

TECHNICAL SKILLS & CORE COMPETENCIES

- **Software & Design:** AutoCAD, Revit, MS Office (Excel, Word, PowerPoint)
- **Core Engineering:** Site Supervision, Earthworks & Concreting, Structural Foundations, Substation & Pipeline Works, BOQ & Quantity Surveying, IFC Drawing Verification

TRAINING & INDUSTRY CERTIFICATIONS

- ADNOC Work Management System (WMS) & Permit to Work (PTW) Certified
- Authorized Gas Testing (AGT) & H2S Awareness & Escape (Level 2)
- Basic First Aid & Operational Fire Fighting Awareness
